**\$129**

***SUPER 20 POINT  
GAS FURNACE TUNE-UP***  
NORMALLY \$189.00

***PRECISION GAS FURNACE TUNE-UP BENEFITS:***

- Lower utility bills by reducing energy consumption and waste.
- Extended equipment life.
- Peace of mind for you and your family.
- Fewer repairs, and improved system reliability.
- Increased heating capacity and efficiency.

***OUR EXCLUSIVE PRECISION GAS FURNACE TUNE-UP PROCEDURE INCLUDES, AS NEEDED:***

1. Technician will listen to your concerns regarding your homes gas heating system. We will diagnose and solve problems at your request.
2. Soap test gas lines in and around furnace to look for dangerous leaks.
3. Gas pressures will be tested and adjusted to assure proper combustion.
4. Remove and clean dirty burners to eliminate poor combustion and save energy.
5. Check electronic or standard pilots to ensure furnace burners will ignite on demand.
6. Inspect entire flue assembly for leaks or corrosion that may cause carbon monoxide poisoning.
7. Test carbon monoxide levels with electronic meter. High carbon monoxide levels can be deadly.
8. Check and adjust fan switch for proper timing and operation.
9. Check all safety controls and emergency shut down devices.
10. Check motor amperage, adjust and oil as required.
11. Inspect blower wheel for balance and cleanliness, advise homeowner if required.
12. Replace standard 1" air filter as needed. (Extra charge for specialty filters).
13. Check and calibrate thermostat for proper operation. (Train homeowner on operation as needed).
14. Check thermocouple and flame switch if applicable.
15. Test temperature rise and adjust to manufacturers specifications.
16. Check all electrical connections, tighten as needed.
17. Inspect for proper combustion air sources and size.
18. Check duct work for proper static pressures and advise.
19. Record make, model and serial numbers for entering into our data base for less expense on future services.
20. Complete and present full written report, make any necessary recommendations.
